Vaccine Research

Children of God for Life <http://www.cogforlife.org/> provides information on vaccines that use fetal tissue. Recently Rev. Thomas J. Euteneuer, President Human Life International wrote about a new pro-life vaccine research company.

The Sound Choice Pharmaceutical Institute (SCPI) is a new pro-life vaccine research company that is challenging, to the core, the practice of pumping unethical vaccines into the bodies of our children. This non-profit company also provides a safe haven for the consciences of parents that find themselves between the rock of government regulations and the hard place of vaccines made from cell lines using aborted fetal tissue. The Sound Choice Pharmaceutical Institute (SCPI) is the answer to these tough realities.

Don't be thrown by the "choice" in the name; their founders are actually helping to provide some real alternatives in this field. Dr. Theresa Dreisher, PhD, founder and CEO of parent company AVM Biotechnology, is a fantastic pro-life biomedical researcher, an internationally renowned stem cell scientist, guest lecturer and educator with over 22 patents. She has made a sacrificial commitment to provide necessary research for the pro-life community so that we can have ethical vaccines as well as credible research about unethical ones that will help us hold Big Pharmaceutical accountable for their practices.

Here are a few stunning facts that Dr. Theresa Dreisher, PhD highlights:

By the time a child enters school the child has received an average of 36 vaccinations - a number of them during the first 12 months of life; several of these contain aborted fetal DNA and cellular contaminants (*contact our office for a chart of vaccines and the fetal tissue used, and where available a non-fetal tissue alternative*), a fact that has many parents, scientists and medical professionals concerned.

Before children received so many vaccinations and before modern vaccines contained aborted fetal DNA, only one child out of 10,000 was diagnosed with autism; now one child out of 150 is diagnosed. Is there a link? Only serious and non-ideological research will provide the answer to than and so many other questions.

SCPI reviews, researches and disseminates the context and content of vaccines and other biologic medicines to enable physicians, pharmacists, parents and grandparents to be "informed consumers." They investigate the biologic and physiologic consequences of human DNA and cellular contaminants in our medicines. Furthermore, they provide a "Pro-Life Produced" stamp on their medicine so that physicians, pharmacists or patients can be confident that the drug does not contain human DNA or cellular contaminants. They also have a "Pro-Life Compatible" stamp to indicate that that drug was not tainted during discovery, development or commercialization by the use of electively aborted,

embryonic or any other unethically obtained human material. I just can't see a downside to this great operation. They are just what we need!

For more information see [Http://www.soundchoice.org/home.html](http://www.soundchoice.org/home.html).

RESOURCES AT YOUR FINGERTIPS

A listing of pro-life resources; you might want to keep this handy for future reference!

Birthright (800) 550-4900

www.birthright.org

Birthright provides caring, non-judgmental support to girls and women who are distressed by an unplanned pregnancy. Using its own resources and those of the community, Birthright offers positive and loving alternatives. Birthright presents many services and refers for many more. We provide friendship and emotional support, free pregnancy testing, and maternity and baby clothes. We also give information and referrals to help clients meet legal, medical, financial, and housing needs. Birthright treats each woman as an individual who deserves kindness and respect, as well as personal attention to her unique situation. All Birthright services are free, absolutely confidential, and available to any woman regardless of age, race, creed, economic or marital status.

Pregnancy Centers (800) 395-HELP

www.optionline.org

Option Line consultants refer each caller to a pregnancy resource center in her area for answers to questions about abortion, pregnancy tests, STD's, adoption, parenting, medical referrals, housing, and many other issues. The toll-free number is available to callers 24 hours a day, 7 days a week.

Nurturing Network (800) TNN-4-MOM (-4666)

www.nurturingnetwork.org

Support network for pregnant women. Educational, and employment assistance, as well as medical, residential and counseling services.

Crisis Pregnancy Hotline 800-848-LOVE (5683)

<http://www.pregnancycenters.org/batesville>

The Crisis Pregnancy Hotline is committed to helping to provide pregnant women a place to call where they can anonymously receive counseling and support to allow them to make an informed decision about their pregnancy. Referrals to agencies where she can receive financial and medical aid, clothes, and shelter.

America's Crisis Pregnancy Helpline

(800) 67-BABY-6 / (800-672-2296)

www.thehelpline.org

Provide education and information concerning prenatal care, nutrition, fetal development, or possible complications during your pregnancy, your options including abortion and adoption questions.

Gabriel Project (800) 910-0191

www.gabrielproject.com

Through the Gabriel Project, church members offer immediate and practical help to any woman. When a woman calls for help on the hot line number (not the church rectory), she is assigned a church volunteer. The volunteer is called a *Gabriel Angel* who, along with the pastor or clergy, helps to discern how the church family can minister to her spiritual needs and assist her and her baby in their physical needs. This act epitomizes the whole Church living out the Works of Mercy, both corporal and spiritual. For example: The mother comes to the church in need of a crib, housing or clothing. Gabriel makes the need known so everyone in the whole church can respond to that need.

Safely Surrendered Baby Campaign

Safe Haven for Newborns

<http://www.babysafe.ca.gov>.

...In California, the Safely Surrendered Baby Law allows an individual to give up an infant without fear of arrest or prosecution for abandonment. The law does not require that names be given when the baby is surrendered. Parents are permitted to bring a baby within 72 hours (3 days) of birth to any hospital emergency room or other designated safe haven in California.

Post-Abortion Resources:

Rachel's Vineyard

www.rachelsvineyard.org

Rachel's Vineyard weekend retreats offer a supportive, confidential and non-judgmental environment where women and men can express, release and reconcile painful post-abortive emotions to begin the process of restoration, renewal and healing. It is a safe place to renew, rebuild and redeem hearts broken by abortion. It creates a place where men and women can share, often for the first time, their deepest feelings about abortion.

Project Rachel

<http://www.hopeafterabortion.com/>

1-877-HOPE-4-ME.

A post-abortion ministry of the Catholic Church, for help in healing emotional and spiritual wounds. The priests and counselors in the Project Rachel network understand the pain and loss that follow abortion. They have led thousands of grieving women and men from despair to hope and peace. Project Rachel counselors can help you to heal spiritually and emotionally, no matter what your faith tradition.

Men and Abortion

<http://menandabortion.info/index.html>

When people think about the role of men in abortion, it seems that they usually think about the stereotype of the man who forces the abortion or the male who abandons. However, there are many roles the man may have played in the experience. This website provides resources for men dealing with a past poor-choice, either the influence they may have had, or the results of something they didn't know about until it was too late.

Silent No More Awareness Campaign

www.silentnomoreawareness.org

The Silent No More Awareness Campaign is an effort to make the public aware of the devastation abortion brings to women, men, and their families. The emotional and physical pain of abortion will no longer be shrouded in secrecy and silence, but rather exposed and healed. This effort is a key to make abortion unthinkable and persuade society that women deserve better than abortion.

End of Life issues

International Taskforce on Euthanasia and Assisted Suicide

P.O. Box 760 Steubenville Oh 43952

740-282-3810

<http://www.internationaltaskforce.org/index.htm>

The International Task Force on Euthanasia and Assisted Suicide is an international leader in the ever-increasing debate over assisted suicide and euthanasia.

The goal of the International Task Force is to make certain that a patient's right to receive care and compassion is not replaced by a doctor's right to prescribe poison or administer a lethal injection.

Major issues addressed include euthanasia, assisted suicide, advanced directives, disability rights, pain control and more. Provides resources for "Durable Power of Attorney for Health Care" Call 800-958-5678 between 8:30am and 4:30pm (eastern time.)

Quick Reference on Fetal Development

A person's a person, no matter how small

Our first nine months of life must have been the most eventful we have ever experienced. Here are some of the major milestones of life before birth – the first chapter of an amazing biography!

Did you know that:

- 1 Immediately after fertilization occurs the cells begin to divide, one becomes two, two cells become four and so on
- 2 5-9 days – the new person implants in the womb of the mother.
- 3 18 day the heart is already forming.
- 4 20 days the foundations of brain, spinal cord and nervous system are beginning to form.
- 1 24 days the HEART BEGINS TO BEAT!
- 2 28 days Muscles are developing along the future spine. Arms and legs are budding.
- 2 30 days - The baby is now 10,000 it's original size. He is now 6-6mm (1/4") long. The brain had human proportions, blood flows in the baby's veins – separate from the Mother's blood.
- 3 35 days – The pituitary gland is forming. The mouth, ears and nose are taking shape.
- 4 42 days – the skeleton is formed; the brain coordinates the movement of the muscles and organs. Reflex responses have begun. The penis is formed in boys. Mom has now missed her second menstrual period.
- 5 43 days – brain waves can now be detected

- 6 45 days – buds of teeth have appeared
- 7 8 weeks – the child is a well proportioned baby, weighing in at a gram (1/30th of an ounce) and measuring 3cm (1-1/8”) EVERY organ is present, The heart beats sturdily, the stomach produces digestive juices, the liver makes blood cells, the kidneys function, even taste buds are forming.

.... *For the rest of the story, contact our office and we will send you a bookmark of fetal development.*

And now for all you sports fans...

Quarterback Who Led Florida Gators to Championship Almost Victim of Abortion

Quarterback and Heisman Trophy winner Tim Tebow recently led his Florida Gators football team to become national champions in a win over Oklahoma. However, Tebow might never have been born, and his accomplishments may never have occurred had his mother followed a doctor's recommendation.

Pam Tebow and her husband were Christian missionaries in the Philippines in 1985. During the pregnancy Pam contracted amoebic dysentery, an infection of the intestine caused by a parasite found in a contaminated food or drink and went into a coma. The treatment required strong medications and the little pre-born “Timmy Tebow” experienced a severe placental abruption. Expecting a stillborn baby, doctors recommended an abortion. Pam Tebow refused and cited her Christian faith as the reason for her hope that her son would be born without the devastating disabilities physicians predicted.

Pam ultimately spent the last two months of her pregnancy in bed and, eventually, gave birth to a health baby boy. On August 14, 1987- Heisman Trophy winner Tim Tebow was born!
